

Cy.Pag. S.r.l. is an international company that designs, manufactures and sells

- Highly innovative pneumatic components for industrial automation
- Anti-collision systems.

Its specialization has always been the design and production of customized cylinders, which are designed and manufactured based on the specific needs of customers, to which have been added the components that can be sold.

While the experience gained by the staff and the technology of the machinery used allow to meet the characteristics of the product, the mission of our organization is increasingly focused on the flexibility of the service and the urgent needs of customers, well aware that safeguarding our future depends on our ability to preserve, respect and protect the human and environmental resources at our disposal.

In order to guarantee our customers continuity and progress, our Company is committed to:

- continuous improvement of all business activities/processes;
- the prevention of environmental pollution and the continuous improvement of management for Health and Safety and the Environment, first of all by ensuring safe and healthy working conditions and working in a sustainable way;
- the reduction of health and safety risks and, where possible, the root elimination of the hazards from which they arise;
- compliance with the applicable legal requirements, the reference standards in their current version and the other requirements that the organization subscribes to, which relate to its own health, safety, environmental, product and service aspects;
- provide the framework for the periodic establishment and review of quality, health, safety and environmental objectives and targets through careful data analysis;
- to identify and make available to our organization every resource necessary to achieve the targets set and objectives identified;
- to define, collect and analyze every possible data so that it is possible to identify, pursue and achieve (measurable) improvement objectives for each individual Company Function;
- to identify and make known to the staff of the company the requirements that the Customer requires, those that do not require but expect from us are identified and satisfied, those made mandatory by laws and/ or technical standards deemed applicable, as well as other requirements identified by our company and aimed at providing the customer with a valid motivation to choose our company as a reliable partner. So that all staff are aware of the relevance and importance of their activities in achieving the required quality or that we intend to provide;
- identify and inform the staff of their health, safety and environmental obligations;
- to encourage the participation of workers in both Health and Safety, Environment and Quality, consulting them through their representatives on issues related to Health and Safety;
- to be attentive to the technological innovation of departments' and offices' equipment and to the innovation of the IT infrastructure, so that what is achieved meets the requirements specified above;
- continuous improvement of the professional level of our staff;
- carefully select the suppliers of materials and services that can positively influence the quality we intend to provide, including their impact on health, safety and the environment, proposing a more active communication aimed at raising the supplier's awareness of health, safety and environmental issues;
- to pay close attention to the continuous improvement of internal organizational and communication aspects in order to make the collaboration with customers and suppliers more efficient;
- to maintain effective means of communication on environmental and health and safety issues to stakeholders.
